Art Unit: 1649

1) Claims 1 to 16 are pending in the instant application.

2) Claim 16 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. A properly dependent claim can not conceivably be infringed without infringing any of the claims from which it depends. Claim 16 can be infringed by a process that employs a polynucleotide that is not encompassed by claim 1. See M.P.E.P. 608.01(n)III.

3) Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 11, drawn to an isolated nucleic acid, classified in class 536, subclass 23.5.
- II. Claims 12 to 15, drawn to an isolated polypeptide, classified in class 530, subclass 350.
- III. Claim 16, drawn to a method of detecting a nucleic acid in a sample, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons: The nucleic acid of claim 1, the polypeptide of claim 2 and the probe employed in the method of claim 3 are three materially different compounds each of which can be made and used without the others. They lack unity of invention because they lack a common utility that is based upon a common feature or combination of features that distinguishes them as a group from the prior art.

Art Unit: 1649

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Ulm whose telephone number is (571) 272-0880. The examiner can normally be reached on 9:00AM to 5:30PM.
